PREFACE

The Department of Advanced Education works with other government departments to ensure that there are adequate numbers of appropriately trained persons to provide the health and social services required by Albertans. The Alberta Health and Social Services Disciplines Committee, comprised of representatives from the Departments of Advanced Education, Career Development and Employment, Health, Social Services, and the Professions and Occupations Bureau, is charged with coordinating efforts in this area. The Committee initiates the collection of information to provide an overview of supply and demand for health and social services manpower. This information aids post-secondary educational institutions, service agencies and government departments in making decisions pertaining to manpower planning in the health and social service fields.

The Inventory provides information on the output of health and social service education programs in the Province. The data, which primarily report enrollee and graduate statistics, are used in conjunction with information provided by the service sector to anticipate future demand which may be placed on the post-secondary education system, and assess the capacity of the system to meet that demand. Additional information on manpower supply and demand is available in the Alberta Health and Social Services Disciplines Committee publication, *Health and Social Service Manpower in Alberta.*

The Inventory does not provide descriptions of the various health and social service programs offered. Calendars providing detailed program descriptions can be obtained by contacting the registrar's office of the appropriate vocational centre, college, school of nursing, technical institute or university.

The information in this edition of the Inventory spans the academic years 1983-84 to 1987-88. Enrolment and graduate data are updated on an annual basis.

Further information on the Inventory can be obtained by contacting:

FORMAT OF INVENTORY

The information in this inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of education programs and institutions offering the programs;
2. data on the number of applicants, enrolments and graduates for the academic years 1983-84 to 1987-88; length of programs; intake and graduation dates; quotas; and,
3. a "Comments" section to explain the data when necessary.

The tables differentiate between part-time and full-time students wherever possible. If this is not possible, a comment is added to indicate that the information has been merged, and that the data is aligned in the centre of each column.

An example of the table format used to display enrolment and graduate data is provided below.

Academic year	1983-84	1984-85	1985-86	1986-87	1987-88
Quota				50	50
Applicants	FT	FT	FT	FT 100	FT 150
Enrolments					
First Year				50	50
Second Year					45
Graduates					43

If information on the attrition experienced by a particular class is being sought, it can be obtained by following a cohort of enrolments from first year entry through to graduation. For example, in the above table, the second year enrolments shown in 1987-88 represents the same class shown in first year during 1986-87. The number of graduates from this two year program is reported in 1987-88. The attrition over two years is seven students, as two failed to graduate in their final year. Footnotes are provided to explain discrepancies between enrolment years and the number of graduates from the last year of study.

DATA COLLECTION AND DEFINITIONS

To collect the data presented in this inventory, the Program Coordination Branch of Advanced Education sent request forms to 25 institutions for enrolment and graduate data for 131 post-secondary programs in the various health or social service disciplines. The format of the request forms are identical to the table format used in the Inventory. Institutional staff were asked to fill in the required information for the most recent academic year and to return the forms. Follow-up telephone calls were made when required.

Terms used in the data request forms were defined as follows:

1. **Applicants**: the number of qualified applications submitted to a program, from which enrolment was chosen for a given academic year.

2. **Enrolments**: the number of students accepted into a program, broken down by academic year of study whenever the duration of the program exceeds one year.

3. **Graduates**: the number of students who successfully completed all program requirements and were awarded a certificate, diploma or degree.

4. **Academic Year**: the period commencing September 1 to August 31 of the following year (e.g. September 1, 1987 to August 31, 1988).

In interpreting data, it is important to note the following:

1. The quota refers to the optimal capacity of a program, and is used as a general guideline for determining maximum intake. Quotas are occasionally exceeded due to anticipated attrition or student transfers between programs.

2. The deadline for accepting applications varies from program to program. While some programs adhere to a set deadline, others limit the number of applications accepted.

3. Students often apply to more than one program in any given year. For some programs, students will apply to an affiliated health and social service agency rather than to the program directly.

4. Enrolments are classified according to year of study depending upon the level of the majority of courses taken. Enrolment figures may increase between years of study due to students transferring into a program or repeating a year.

5. The comments which follow the enrolment data attempt to clarify the information provided and should be reviewed carefully to avoid misinterpretation.

6. Provincial summaries are provided on light blue pages preceding each program category. A breakdown of the enrolment data by institution is provided in the pages immediately following to the summaries.

COMMENTS:

1. During the 1984-85 academic year, AVC - Lac La Biche ran two Community Health Worker programs.

COMMENTS:

1. A one-year certificate is still available but is designed primarily for individuals already employed in the corrections field. Students who received diplomas did not, in most instances, previously receive a certificate.
2. The diploma program was under review from 1983-84 to 1984-85; only the certificate program was offered during that period.

COMMENTS:

1. The Correctional Officer Certificate is an inservice program offered on a part-time, contract basis at various correctional institutions, with completion possible in a minimum of two years. There is no set quota for the certificate program.
2. The 1983-84 quota includes spaces available in the Justice Administration Department as well; hence the variance with quota figures in subsequent years.
3. Enrolment and graduate data reflect definitions specific to Mount Royal College. In 1984-85, three part-time students in second year were former graduates of the program who returned for upgrading.

COMMENTS:

1. As of 1987-88, there is no established quota for the three annual intakes.
2. Graduation dates are approximately 24 months after intake, depending on the student. For example, a student from the October 1985 intake may graduate in the fall of 1987. The most recent graduate figures are, therefore, incomplete.

2. Graduate figures refer to only those students who have convocated. Graduates who completed the program in June do not convocate until January of the following year, and are therefore included in the statistics of the latter. Graduate figures may aiso exceed third year enrolments as a result of late entrants repeating the program.

COMMENTS:

1. The quota for the first course in the program is 100, and 50 for all courses thereafter.
2. The program is offered by distance delivery and is geared to part-time students. Those who wish may complete the program within one academic year, though few do . This accounts for the low number of graduates in comparison to enrolments. The reporting format was revised in 1985-86 to reflect only new program applicants and a FTE enrolment count.

COMMENTS:

COMMENTS:

1. Intake and graduation dates vary for each program. Those following a self-paced format encourage students to complete course requirements within six months.
2. Students taking refresher nursing for credentialling may write the CNATS examination before completing the entire program, and will often choose not to go back and complete the program if successful. These students are included as graduates.
3. Data for Lethbridge Community College include enrolments at the Chinook Educational (Pincher Creek and Crowsnest Pass) Consortium.

Graduates[3]	**152**	**145**	**142**	**154**	**99**

COMMENTS:

1. Enrolment data refer to the on-campus program and brokered program at AVC - Grouard. A separate category for Nursing Assistant Refresher was included in the 1987 edition; hence the variance in enrolment data from those provided for the regular program in previous editions of the Inventory.
2. Determining the number of applicants is difficult since applications are carried over from one intake to another, and students may be referred from manpower offices rather than apply directly to the program. In 1987-88, on-campus classes were filled from students on a waiting list; 80 applications were submitted for the brokered program at AVC - Grouard.
3. Enrolment and graduate figures include data from off-campus locations.

ENROLMENT DATA :

Total	**n/a**	**111**	**52**	**51**	**57**	**49**	**38**	**39**	**34**

COMMENTS:

1. Data for the refresher programs were segregated from statistics for the basic nursing assistant programs starting in 1987. Previous editions of the Inventory provided data for both programs in a combined format.
2. The number of applicants to the AVC - Calgary program in 1985-86 is unavailable.
3. Individuals interested in returning to practice apply to the Professional Council of Registered Nursing Assistants, and are referred to the program if qualified. Applicant figures therefore reflect the number of candidates who have passed initial screening by the Council.

COMMENTS:

1. In 1986-87, in addition to the 40 spaces in the basic baccalaureate program, an accelerated route was introduced for a three year period. Forty spaces are available in the accelerated program, wherein students enter the third year of the program and complete it after 24 uninterrupted months.
2. Students enroll in a pre-professional year and are admitted officially to the second year of the program. Enrolment data include both full-time and part-time students. Increases in fourth-year enrolments resulted after admission was granted to post-diploma students.
3. Graduates include both full-time and part-time students.

Graduates	**75**	**60**	**66**	**77**	**101**

COMMENTS:

1. The quota figures make allowance for transfer students, but do not include continuing second-year students. The quota reduction in 1985-86 reflects a program revision intended to reduce attrition and increase the number of graduates of the program.
2. Transfer students with credit for first-year course work have in the past been admitted into the second year of the program; hence the discrepancy in enrolment from year to year.

Fourth Year	**43**	**48**	**51**	**57**	**54**
Graduates	**45**	**42**	**45**	**48**	**47**

COMMENTS:

1. The quota does not include 22 spaces temporarily available for a Degree Completion route established for practitioners holding a diploma from a foreign educational institution.
2. The increase in the number of students from third to fourth year is a result of several students returning each year to upgrade their diplomas, and also the inclusion of students in the Degree Completion program.
